

MEMORANDUM

TO: All Transporting EMS Agencies
FROM: Ohio Department of Health
DATE: May 22, 2020
RE: Bioquell® Decontamination Unit Locations

The Ohio Department of Health has provided the following list of locations that have Bioquell® decontamination units that can be used to decontaminate emergency and non-emergency vehicles. The Bioquell® system uses 35% hydrogen peroxide vapor technology to eliminate pathogens on exposed surfaces within the vehicle. Vehicle decontamination takes approximately an hour.

Please contact the hospital representative in your region listed below to learn more about Bioquell® decontamination procedures.

County	Region	Hospital	Facility Contact
