June 28, 2016

Dear EMFTS Board Members:

Attached is the final project report for our pediatric traumatic brain injury research, Pragmatic Deficits after Childhood Traumatic Brain Injury: Caregivers' Perspectives. This report includes two papers that will be submitted for publication. The first paper reports the findings from parent interviews. The second paper reports observational findings from parent-child conversations in the home.

Please let me know if you need further information. Thank you for supporting this research project.

Sincerely,

*Casey Keck*

Casey Keck, MA, CCC-SLP
